**WIDE BODY**

## ML 63 wide body R

Our **wide body R** aero body kit fits the 2012 ML model (w166). It has been designed to enhance both racing esthetics and performance on the track.

Larger openings in the front bumper and hood vents help to get a better engine cooling.

Carbon fiber inserts and carbon fiber front spoiler lip give it a better racing and aggressive look.

The front bumper set features LED daylighters and directional foglights bringing your car to a racing style level.

The **wide body R** has a set of fender flares 10 pieces with air intakes, allows to mount wider wheels in 22" and gives an aggressive look and a visual power to this V8 engine vehicle.

The carbon fiber rear diffuser combined with the double twin tip exhaust achieves the overall aggressive look of the vehicle.

**Racing and aggressive look.**
